

4<sup>th</sup> November 2022

Dear Parent/Carer,

### **MapMe2 Study – Year 7 Students**

The MapMe2 study team have contacted us to say they will be coming into school to take follow-up measurements of some students who joined the study in year 6 and were measured in their primary schools. If your child is involved in the study, consent for follow-up measurements was sought in primary school unless you opted out. The MapMe2 team will take follow up measurements in school during this year.

If this relates to your child, please see the attached letter.

Yours sincerely,

Miss J. Gillies  
Head Teacher

## Height and weight checks for children in Year 1 and Year 7

Every year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Height and weight measurements are used to calculate weight status. We collect this information because it is in the public interest to understand how many children are overweight, healthy weight or underweight. Your child's primary school took part in the programme last year.

The National Child Measurement Programme is taking part in a research project run by Newcastle University called MapMe, and so will additionally be measuring children who are now in Year 1 and Year 7 (those who were in Reception and Year 6 last school year).

The MapMe project aims to support parental knowledge and awareness of child weight status and look at how child weight status changes over time. We will share de-personalised data with the project team, including your child's date of birth, date of measurement, age, sex, height, weight, weight category, ethnicity and publicly available information about the wider postcode that you live in, for research use. If you would like more information on the MapMe project, or if you do not wish for your child's de-personalised information to be made available to the MapMe research project, please let us know using the contact details below:

### **Maintaining the well-being of children in the NCMP**

The wellbeing of children and families is very important. Measurements are conducted in a sensitive way, in private and away from other children. Individual results are not shared with your child or their school. The weight and height information is shared only with you in the parent or carer feedback letter. **It is your choice if you share the information with your child.** If you are concerned about your child's growth, weight, body image or eating patterns, seek further support from a school nurse or General Practitioner.

The emotional impact of the NCMP has been researched and studies show that body image, self-esteem, weight-related teasing and restrictive eating behaviours do not change as a result of being measured or receiving feedback.

A feedback letter will be sent to you with your child's results. Full study results will also be published on the MapMe study website at the end of the project in 2024.

**The checks are carried out by trained health care providers. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils.**

### **The information we collect and what it is used for is listed below:**

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets may also be linked such as your child's dental survey results or any visits to hospital they may have had. Linking your child's information in this way helps us to understand how and why the weight status of children is changing, and how this affects children's health
- your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England
- your address is required to send you your child's feedback letter. This will include your child's measurements together with information about healthy eating, being active and related activities available in your area.

**All the data collected is also used for improving health, care and services through research and planning.**

**All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.**

### **How the data is used**

**The information collected from all schools in the area will be gathered together and held securely by South Tyneside Council. We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP. We will share de-personalised data with the study team at Newcastle University.**

### **Withdrawing your child from the Year 1 and Year 7 height and weight checks**

If you are happy for your child to be measured, you do not need to do anything.

If you do not want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight please let us know using the contact details provided above.

Children will not be made to take part on the day if they do not want to.
